This Annual Author Index contains over 70,000 references to the authors and editors of approximately 37,600 abstract records published in the 12 monthly issues of *Psychological Abstracts* from January 1988 through December 1988. A companion work, the Annual Subject Index, references these records by topic.

In this volume, all authors and editors whose work was abstracted or cited in *Psychological Abstracts* for the periods indicated are listed alphabetically by surname. However, the Author Index is intended to be a name index only and not a person index. "Adams, P." will be listed separately from "Adams, Paul," even though the names may refer to the same person. Two listings for "Adams, P." may also refer to two different authors. Due to variation in the representation of names that exist in source documents, alternative locations should be consulted. As many as four authors may be listed per selection. If there are more than four, the fourth author is followed by "et al." Primary entries consist of author name(s), the title of the selection, the language of the selection (if foreign), a citation of the original source document, and the *Psychological abstracts* abstract number under which the entry appeared. All secondary authors are cross-referenced to the primary entry, and the abstract number in *Psychological Abstracts* is printed as well.
